Étape 2 - Adjust Tidal music format for HomePod

In this step, please head to the menu icon with shape of three lines and choose "Preferences" > "Convert". Here, you are allowed to set any output format like MP3, M4A, M4B, FLAC, WAV, AAC, and go further to alter format parameters like channel, bit rate, sample rate, etc. to your requirements.

Étape 3 - Convert and download Tidal music for HomePod

After setup, hit on "OK" button to confirm and save. When getting back to the main window, simply touch the "Convert" button at the bottom right corner to launch the conversion process. Wait until the process comes to end. And then, all added Tidal tracks are downloaded to your local computer.
