How to change settings to open pdf files in chrome

The native Chrome PDF viewer is the default way to open PDF files and view them in Chrome. If you'd like to change your default PDF program, check out the best free PDF readers for Windows and Mac In Chrome, click the three-dot menu and go to Settings > Advanced > Content Settings > PDF documents. Click on the ellipses (3 dots) in the top-right corner and then click Settings from You can change default PDF reader setting to download automatically in chrome browser. How to Enable and Disable the Chrome PDF Viewer: Download PDF files/documents If you turned off the setting so you download the PDF file instead of opening it in Chrome, the file will open in your default PDF program. Method 1 I have seen this, but it makes chrome download all files and open them in Adobe. You can also change your computer's default PDF viewer in your Windows or Mac settings. In the right-pane, scroll down and click on Site Settings option. It's relatively simple to adjust Follow these steps to open a PDF file in Chrome: Open Chrome settings. Click on the three vertical menu dots in the right hand corner of the Chrome bar and choose SETTINGS. On Site Settings screen, expand How to enable the native Chrome PDF viewer. So what I want is: if I click a random PDF, it should open in the chrome browser, if I click a downloaded file from the bar at the bottom or from chrome://downloads it should open the file in Adobe. Under settings, click on EXTENSIONS. (Just as it used to be two weeks ago) A new tab opens and displays the On Chrome Settings screen, select the Privacy and Security tab in left-pane. Open Chrome settings. Use the toggle switch to enable or disable Chrome's built-in PDF viewer.
