Introduction

Industrial coffee grinders are now very commonly used in coffee roasting and packaging machines, thanks to the ability to grind coffee super strong, super fast along with many other sized machines to meet the diverse needs of customers. client.

Let's find out with Vina Nha Trang Engineering JSC (VNT)!

What should you keep in mind when using an industrial coffee grinder?

Due to the friction created during the coffee grinding process, the grinding disc quickly gets hot. Customers should not grind continuously for too long (>1 hour) to not affect the coffee flavor. It is best to run the machine for 30 minutes and rest for 10 minutes to ensure the best durability and quality of coffee.

Prepare clean ingredients to avoid chipping or damaging the grinding disc while grinding.

You should not clean the machine with water, you should only clean the outside of the machine. As for the coffee grinding head, just remove it and use a brush to clean the remaining coffee powder.

Because these are industrial agricultural grinders, they are often not available at branches. Customers who want to order please contact sales staff.

Along with maintaining the inherent advantages of mini coffee grinders and adding features of industrial grinders, semi-industrial coffee grinders are a perfect combination that customers can trust. use.

Contact Vina Nha Trang Engineering JSC (VNT) immediately for advice and support if you are looking for a reputable supplier of industrial coffee machines.

Industrial coffee grinder

The last type of coffee grinder equipment that we want to mention in today's sharing article is the industrial coffee grinder line. First of all, this is a high-capacity industrial coffee grinder. Specifically, the machine runs strong and has a fast grinding speed, ensuring daily output of ground coffee. At the same time, the machine has high durability and the quality of ground coffee powder is even and smooth.

Not only that, industrial coffee grinder is one of the products chosen and highly appreciated by customers among the mechanical products we provide. If you own a facility that produces and supplies large quantities of coffee, you should buy a new industrial coffee grinder that can meet the needs of customers.

Advantages of industrial coffee grinder

Unlike conventional low-cost industrial coffee grinders on the market, Vina Nha Trang Engineering JSC coffee bean grinder has an extremely strong grinding speed, grinding both caramelized roasted coffee and butter without clogging. Especially great durability, rarely damaged

The machine has a modern adjustment knob that helps adjust the smoothness to a variety of levels - meeting customer tastes.

High productivity up to 100kg/hour, helps grind continuously for many hours without damaging the machine.

Large capacity coffee grinder, adjustable grain size

Simple to use, ensuring operator safety.

The machine uses 304 stainless steel to ensure food hygiene and safety and prevent rust.

The industrial coffee grinder line is superior to other machines on the market in terms of smoothness thanks to the precision CNC machined cast iron grinding disc with sharp grooves and high durability that enhances the flavor of powdered coffee after grinding.

Accompany the development of the coffee and agricultural industries through supplying high quality equipment, processing lines at competitive prices, attentive engineering service, and satisfying customer expectations.

Become a globally trusted manufacturer and supplier of processing equipment for coffee and agricultural products.
