input type=File name= accept=.pdf,.txt> Unmute. TipMissing: pdf Try following: input type=file accept=application/ />. In this example, we create file input using type=file attribute. input type=file>. Practical example. Note: The accept attribute can only be used with. input type=file>. File uploads should be validated on the server input type=File name= accept=video/*> Note: The * is the wild card, and it means that it accepts all video formats. To make it allow only pdf files, Just put a URL to it here and we'll apply it, in the order you have them, before the CSS in the Pen itself. input type=file id=input-id accept=image/jpeg/> The accept attribute specifies a filter for what file types the user can pick from the file input dialog box. input type=file id=input-id accept=image/jpeg/> To get the HTML file input form element to only accept PDFs, you can use the accept attribute in modern browsers such as Firefox 9+, Chrome+, Opera+ and IE10+ like such: input name=file1 type=file accept=application/pdf> You can string together multiple mime types with a comma input type=file accept=image/*,.pdf /> Using file inputs. input type=File name= accept=audio/*> In modern browser you can also use file input type=file accept=.pdf> Run. Auto running. Reset. Take in consideration that the big problem with doing this with JavaScript is to reset the input file. You can also link to another Pen here (use Extension) and You could use JavaScript. Tip: Do not use this attribute as a validation tool. Well, this restricts to only JPG (for PDF you will have to change the mime type and the magic number). To specify the text or PDF files, we use the following code. You could use JavaScript. A basic example The accept attribute specifies a filter for what file types the user can pick from the file input dialog box. Take in consideration that the big problem with doing this with JavaScript is to reset the input file. To specify the Audio file, we will use the following code. Note: The accept attribute can only be used with. Well, this restricts to only JPG (for PDF you will have to change the mime type and the magic number).
