This part of ISO specifies a range of pipe sizes and pressure classes, and gives requirements concerning colours. NOTE The producer and the end-user can come to agreement on the possibilities of use for temperatures above °C on a case-by-case basis. ISO specifies the characteristics of solid-wall pipes made from unplasticized poly (vinyl chloride) (PVC-U) for piping systems intended for water supply and for buried ISO consists of the following parts, under the general title Plastics piping systems for water supply and for buried and above-ground drainage and sewerage under pressure This part of ISO specifies the characteristics of solid-wall pipes made from unplasticized poly(vinyl chloride) (PVC-U) for piping systems intended for water supply ISO specifies the characteristics of solid-wall pipes made from unplasticized poly(vinyl chloride) (PVC-U) for piping systems intended for water supply and for buried ISO Plastics piping systems for water supply and for buried and above-ground drainage and sewerage under pressure – Unplasticized poly(vinyl chloride) ISO was prepared by the European Committee for Standardization (CEN) Technical Committee CEN/TC, Plastics piping systems and ducting systems, in collaboration with ISO Technical Committee ISO/TC, Plastics pipes, fittings and valves for the transport of fluids, Subcommittee SC 2, Plastics pipes and fittings for water supplies, in accordance with the Agreement on technical EN ISO ISO /1 DIN Pressure Pipe System Imperial & Metric Range EN Inch Series Nominal Outside Nominal Wall ISO\_2\_\_e download as PDF File.pdf), Text File.txt) or read online for free. This is a preview of "ISO " For temperatures between °C and °C, Figure A applies. Guidance for installation is given in ISO/TR [1]. NOTE It is the ISO ISO and ISO Characteristics for fitness for purpose (mainly for joints) are established in ISO This part of ISO specifies the characteristics of pipes. Guidance for assessment of conformity is provided in ENV [2].
