Sol. The A. If f is a homomorphism from (A, B) to (B, A) , we write $f: A \rightarrow B$ or $A \xrightarrow{f} B$ (sometimes $A \xrightarrow{f} B$), and we call an arrow from A to B . Note that gf is defined if and only if the domain of g coincides with the range of f .
Basic Algebra (Solutions) by Huah Chu Exercises (S, p) Let $S = \{1, 2, \dots, n\}$. Determine all the sub-groups of $(Z = Z_6; +)$.
Language: English. Item Size: 1.5 MB. Description: The present volume is the second in the author's series of three dealing with abstract algebra. English. Originally published in 1974. Give an example of two maps α, β of S into S that $\alpha\beta = 1_S$ but $\beta\alpha \neq 1_S$. Can this happen if α is a permutation?
