Instead of letters, each block contains the digits through the same digit will never repeat within a word. Kakuro (literally "addition cross"), are a kind of numeric crossword puzzle, originally published as "Cross Sums" in the United States by Dell Magazines. The higher the booklet number, the harder the puzzles. If you add the digits in a word, the sum will be the number in the clue. Kakuro puzzles offer an exciting combination of sudoku and crossword, with numbers instead of words. The higher the booklet number, the harder the puzzles. A clue of 3 with white cells must be the combination 1,2 and 3. Mix your math and logic skills to solve our printable Kakuro puzzles. Each of these printable booklets contains a collection of eight kakuro puzzles, with the answers in the back. Instead of letters, each block contains the digits through the same digit will never repeat within a word. Download and print off a Kakuro puzzle today and start honing your skills! In the case of the empty cells as clue, it is evident that the answers are 1 and 2. The easiest way to refold a road map is differently. A clue of '3' with white cells can only be filled with a '1' and a '2'. A clue of '3' with white cells can only be filled with a '1' and a '2'. They are now quite popular in Japan, and like Sudoku before it, that popularity has swept back to Europe and the United States. Kakuro puzzles are like a cross between a crossword and a Sudoku puzzle. There are thousands of combinations possible.
