TUP (Telephone User Part) Provides the transport of call set-up information between two A complete, practical guide to the world's most popular signaling system, including SIGTRAN, GSM-MAP, and Intelligent Networks Provides in-depth coverage of the SS Signalling System Noto provide connection-oriented and connectionless network services, and SCCP management services as defined in Recommendation Q Signaling System(SS7) is an architecture for performing out-of-band signaling in support of the call-establishment, billing, routing, and information-exchange functions of the public switched telephone network (PSTN) Common Channel Signalling System No(SS7) is data communications network standard. SS7 provides call management, data base query, routing, flow and congestion control functionality for telecommunication networks The SS7 standard defines the procedures and proto-col by which network elements in the public switched telephone network (PSTN) exchange information over a digital signaling network to enable wireless (cellular) and wireline call setup, routing, and control Signaling Systemwas introduced by AT&T in and approved by worldwide standard bodies in SS7 basic functions are as follows MTP (Message Transfer Part) Provides a reliable transfer and delivery of signaling information in a signaling network. SS7 is intended to be used as a control and management network for • Out-of-band signaling system Designed for call control, remote network management, and maintenance Combines circuit-switched and packet-switched networks Suitable Signaling Systemwas introduced by AT&T in and approved by worldwide standard bodies in SS7 basic functions are as follows MTP (Message Transfer Part) A complete, practical guide to the world's most popular signaling system, including SIGTRAN, GSM-MAP, and Intelligent Networks. Common Channel Signalling System No(SS7) is data communications network standard. SS7 is intended to be used as a control and management network for telecommunication networks.

 Difficulté **Moyen**

 Durée **630 minute(s)**
