Click to view in HTML datasheet. HTML. Lifecycle: Obsolete. STMicroelectronics. Stock: Not Available. The LM, LM, LM are monolithic integrated circuits in TO, TOFP, TO and D<sup>2</sup>PAK packages intended for use as positive adjustable voltage regulators. The LM device is an adjustable three-terminal positive-voltage regulator capable of supplying more than A over an output-voltage range of V toV. Datasheet Download. More results. Mfr. Part They are designed to supply more than A of load current with an output voltage adjustable overa toV range. Similar DescriptionLMK. They are designed to supply more than A of load current with an output voltage adjustable over a toV range. Learn more about ECAD Model. Availability. No: LMK. MfrSTMicroelectronics. It requires only two external resistors to set the output voltage. Compare Product. TOTO D2PAK ABSOLUTE MAXIMUM RATING Customer No: Description: Linear Voltage Regulators V Adj Positive. Complete Your Design. Please enter Description. LMKV toV adjustable voltage regulators. The nominal output voltage is selected by means of only a resistive divider, making the device exceptionally easy to use and eliminating the stockingof manyfixed regulators. Features 3 Description. The LM and LMN series of adjustablepin positive voltage regulators are capable of supplying in excess of A over a V to V output LMK Datasheet (PDF)STMicroelectronics. Link URL 3 Description.
