Purpose: To develop a non-hermetic, non-cavity PED screening and qualification requirements for MIL-PRF Conducting teleconferences twice a month to keep document effort moving forward in between JE meetings MIL-PRF Product details. IS "S~ uith~t refere~e to a nt, the This specification contains the performance requirement and verification methods for semiconductor devices. This specification covers the performance requirements for milliwatt, silicon, low-noise, voltage regulator diodes with voltage tolerances of MI L-S-l%OOJ Referefue to associated detail soecificatfon. Detail requirements and characteristics are specified in the specification sheets Appendix J Task Group. This specification is approved for use by all Departments and Agencies of the Department of Defense. Started to address need for military grade PEDs in government programs. This specification covers the performance requirements for NPN, silicon, low-power transistors The main body specifies the performance requirements and – US DLA specifications, MIL-PRF and MIL-STD, govern the quality conformance testing sequence per-formed on discrete MOSFET semiconductors This specification establishes the general requirements for semiconductor devices. SCOPE. Scope. For purposes of this specification, b!fwn the term uSW=if j&. MIL-S Semiconductor Devices, General Specification For (Renumbered MIL-PRF) L-PRF SCOPE Scope. Detail requirements and characteristics are specified in the detail specification This specification establishes a heritage program of semiconductor devices the military and space community can rely on to be dependable and available.

 Difficulté **Difficile**

 Durée 102 heure(s)

 Catégories **Art, Énergie, Alimentation & Agriculture, Machines & Outils, Recyclage & Upcycling**

 Coût 49 USD (\$)
