The ESP E NodeMCU kit pinout diagram is shown below. We've created a convenient PDF that you can download and print to have the ESP diagrams close at hand Test the input voltage of TOUT (Pin 6). The input voltage range isto V when TOUT is connected to external circuit. The ESP_IOT_PLATFORM is a demo application based on ESP_RTOS_SDK. Use system_get_vddinstead of system_adc_read. We've put together a handy PDF that you can download and print, so you always have the ESP diagrams next to you: Download PDF Pinout Diagrams» ESP Peripherals ESPEX has one I2S data input interface and one I2S data output interface, and supports the linked list DMA. I2S interfaces are mainly used in applications such as data collection, processing, and transmission of audio data, as well as the input and output of serial data NodeMCU is an open-source Lua based firmware and development board specially targeted for IoT based Applications.
