It is factory-set to position to designate a K-type E5EX-P E5EX-P Precautions Mounting Input Connection The dimensions of the Temperature Controller conform to DIN To reduce inductive noise influence, the lead Example: E5EX-AH, Relay Output Unit E53-R, Current Transformer E54-CT1 Models set to display in degrees Fahrenheit (°F) can be ordered by adding “-F” to the end of the OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by Memory Bank Function. Advanced PID control with two degrees of freedom improves stability and response speed. Failure to heed precautions can result in injury- The following conventions are used to indicate and classify precautions in this manual. E5EX-BA/A02/ACompactx mm (DIN) Temperature Controller with Communication Capabilities and Memory Banks Advanced PID control with feed-forward circuitry (E5EX-P E5EX-PTemperature Sensor Selector (SW, INPUT) This selector selects the temperature sensor to be used. Ten alarm modes, listed in the following table, can be selected using this switch. terminal block, use copper braided or solid wires with a gauge of AWG to AWG (equal to a cross-sectional area of to mm²). Always heed the information provided with them. By switching from a memory bank to another, different parameters can be selected at a time with ease E5EX-P E5EX-PA Alarm Mode Selector (SW ALM) Alarm mode selector is provided for all E5AX Temperature Controllers. Select from seven temperature sensors and a total of temperature ranges (seven Fahrenheit and seven Celsius) Use the specified size of crimped terminals (M3, width mm or less) for wiring. Switch Mode (SW) Alarm output Setting range E5EX-H. The switch is factory-set to position 2, i.e., the upper-limit alarm mode. DIN-sized (x mm) Temperature Controller Featuring Advanced PID Control and Heater Burnout Detection. Heater burnout alarm built in. (The stripping length is 10 mm.) OMRON products are manufactured for use according to proper procedures by a qualified operator and only for the purposes described in this manual. The E5AX-BA/E5EX-BA has memory banks (memory bank through 7) where parameters such as main setting, alarm values, PID constants, and input shift values can be preset. To connect bare wires to the.
