By the author of Thinking in Java, covering version of the Java On Java Javain Action is a clearly written guide to the new features of Java It begins with a practical introduction to lambdas, using real-world Java code. Version (ember) includes independent supplemental subsections that cover features through Java These can be seen in the table of contents, in subsection titles that start with New Feature. Moreover, those changes will be both deep and profound, affecting virtually all types of Java applications. On-Java-8_ Cannot retrieve latest commit at this time. HistoryMB. Although all are important, three stand out. Simply put: JDK will change the way you program. They are: xLambda As with previous Java releases, JDK contains a large number of new features. Next, it covers the new Streams API and shows how you can use it to make collection-based code radically easier to understand and maintain With no doubts, Java release is the greatest thing in the Java world since Java (released quite a while ago, back in). Last updated on Bruce Eckel. This book is intended for Javain Action is a clearly written guide to the new features of Java It begins with a practical introduction to lambdas, using real-world Java code. It brings tons of new features to the Java as a language, its compiler, libraries, tools and the JVM (Java virtual machine) itself change the way that Java code is written.
