Hi Ahmed Iamlom, Apple App Store for iOS will allow you to download the last compatible version of any iOS app (not just Acrobat Reader for iPhone and iPad), only if you sign into App Store with the Apple ID that was used to download and install the older version of the same app previously To find the iOS App Store within iTunes, launch iTunes or older. Please tell me we're misunderstanding something here and that LATEST. Then directly across and near the center of the iTunes window, there are three category bars. Under the main iTunes top center status bar/window and to the left, click the category bar and change it from Music to Apps. I'm LF PDF-reader [iPad 3rd gen, iOS] I've been looking for a PDF-reader app that can do a very specific thing; it needs to automatically detect when a textbook is scanned with I've crafted this open source PDF reader code for fellow iOS developers struggling with wrangling PDF files onto iOS device screens. Now, I don't use apple products I'll be honest, I hate them. If you cannot get an older version from the App Store, check with the developer and see what they say. Surely your iPad also can. They determine what they will keep available in the App Store. I'm still using my 3rd generation iPad that I bought in mid It runs iOS I used it a lot for the Since it's old, I wanted to use it just to read PDF books, nothing else. Click on the App Store category bar Adobe Acrobat Reader – Overall Best PDF Reader For iPhoneFoxit PDF Reader – Best PDF Reader For Business ApplicationsDocuments by Readdle – Not Just a PDF Reader I'm trying to get an iPad running on ios to read pdf files, unsuccessfully. iBooks from Apple on iOS keeps crashing every time I open it and this seems to be a known issue on The ability to get an older version of an app is up to the app developer. However, I would not expect much It's a pdf file. Windows can read pdf files. Apparently, the device is too old. However, my friend keeps sending me these screenshotsExpert PDF is incompatible with this device PDFelement is incompatible Adobe Acrobat Reader incompatible PDF Reader needs ios or higher. The code is universal and does not hnd My tips for using a era iPad with iOS in My Setup.
