M. Piga, E. Chessa, +authors. judgment of overall Systemic Lupus Erythematosus (SLE) disease activity. Several studies have sought to objectively evaluate the numerous The Physician Global Assessment (PGA) has been shown to be a valid, responsive, and feasible instrument to capture disease activity in systemic lupus erythematosus (SLE), but its low reliability further supports the need for a standardisation of its scoring Disease Activity is defined as potentially reversible pathology or physiology resulting from the myositis. PGA is a simple instrument and the result is easily understood Background. The recent proliferation of new therapies to treat psoriasis makes critical evaluation of efficacy paramount to prioritize therapeutic potential and minimize patient risk. systematic literature review (SLR) is to describe and analyse the psychometric properties of PGA. Methods Key words: Physician Global Assessment; Psoriasis Area and Severity Index; psoriasis severity assessment tools. The PGA is a well accepted and commonly used scale for evaluating treatment response in clinical trials both in adults and children. L · Objective: The Physician Global Assessment (PGA) is a visual analogue score that reflects the clinician's judgement of overall SLE disease activity. The aim of this · The Physician Global Assessment (PGA) has been shown to be a valid, responsive, and feasible instrument to capture disease activity in systemic lupus PHYSICIAN GLOBAL ASSESSMENT (PGA) Description of Assessment. The aim of this. Clinical findings known or suspected to be · Physician Global Assessment International Standardisation CONsensus in Systemic Lupus Erythematosus: the PISCOS study. Global Assessment (PGA) scoring of disease activity in systemic lupus erythematosus (SLE). An international panel of The Physician Global Assessment (PGA) of treatment response measures the overall response to treatment as assessed by the physician. Physician Global Activity Assessment. Physician Global Assessment (PGA) is a visual analogue score (VAS) that reflects the clinician's. Purpose: Assessment of overall treatment response to intervention(s). The Physician Global The Physician Global Assessment International Standardisation CONsensus in Systemic Lupus Erythematosus (PISCOS) study aimed to obtain an evidence-based and expert-based consensus standardisation of the Physician.
