Good morning. But this is a very important mode, especially for things like official forms which must be exact Recently we had reports of users having problems when printing PDF, where it was not adjusting the printing area automatically. I have checked that I have the most current version of the software and also my printer driver This worked great until the latest Edge update where now these print off the edge of the If the design is very close to the left side, it will probably be cut off because your printer can't print that close to the edge. If you're experiencing issues with text being cut off when printing PDFs in Microsoft Edge, even though the "Fit to Printing Area" option is selected, there are a few steps you can I have Acrobat Reader DC and Windows When I try to print a PDF, it looks fine in print preview, but starts about two inches down the paper and as a result cuts the bottom two Problems with PDF printing in Edge. To resolve the problem manually, users need to click on "Actual Size" and then return to "Adjust to the print area", this way it changes the scale correctly I have Acrobat Reader DC and Windows When I try to print a PDF, it looks fine in print preview, but starts about two inches down the paper and as a result cuts the bottom two inches off. Recently we had reports of users having problems when printing PDF, where it was not adjusting the printing area Try changing the print settings from the application you are using to print. Also, try the steps recommended below and uninstall the full feature printer software from root level We print a lot of PDF files using the fit to printable area from the Edge PDF viewer.
