You have to find sufficient base of algorithms to be able to generate the whole space of MoYu Puppet cubes. Subscribe to the We would like to show you a description here but the site won't allow g: pdf V1 requires to find some Cube to Cube algorithms and trace what is their effect. Version can be solved in the same way (reductive). Version can be solved in the same way (reductive). Every time I mention a symmetric algorithm I mean basically two things We would like to show you a description here but the site won't allow us AlgA-L-J-O-S-AR', U', R', U', R', U, R, U, R, U, R, UAAlgA-N-W-J-R-AR', U', R, U, R, U, R, U', R', U'AlgD-H-X-T-L-DL, U, L', U', L', U', L', U, L, UAAlg My four-phase solution method of the Puppet Cube VAll necessary algorithms. , · My four-phase solution method of the Puppet Cube VAll necessary algorithms. Subscribe to the channel You don't need to learn all the algorithms, just the cycles and the edge flips From one side it looks like a 2x2x2 and from other sides it might look like a 4x4x4, normal algorithms are probably not possible which will likely make these Missing: pdf In this video I'll go through sections) what is the puppet cube2) solving algorithms step) tactics and the logic of this cubeAnd last I show two exthe terminology used by cube solver, I will call sequences of moves "algorithms" although they are not technically so.
