nge colors including white, blue and red. In this talk, we will provide an overview of Raynaud's phenomenon – how it is classified, the clinical features often associated with an underlying connective tissue disease, and its Raynaud's phenomenon is a condition that affects the blood vessels in your fingers and toes. one is exposed to cold weather or stress. It most commonly affects fingers and toes, but can sometimes also affect lips, noses, ears and nipples PATIENT FACT SHEET. This phenomenon was first described by Maurice Raynaud in and later studied by Sir Thomas Lewis in Overall, Raynaud The need for guidelines for the diagnosis and management of Raynaud's phenomenon. Raynaud's disease (also referred to as Raynaud's phenomenon) is a condition where the blood vessels open and close too much in In Raynaud phenomenon, blood-flow restriction occurs during cold temperatures and emotional stress. This happens mainly when you get cold, and it can also happen because of stressful situations. This can be associated with a "pins and need References. Specifically, in Raynaud phenomenon, there is vasoconstriction of the digital arteries and cutaneous arterioles. The literature regarding its clinical diagnosis, associated conditions, investigations, and treatment is substantial, and yet no Raynaud's phenomenon (Ray-nodes fen-om-e-non) causes blood to stop flowing properly to the outer parts of the body. Raynaud's phenomenon (RP) is highly prevalent in the general population (prevalence 3-% depending on the climate) [1]. ud's PhenomenonCONDITION DESCRIPTIONRaynaud's Phenomenon (RP) results when there is a rease in blood flow to the fingers and toes when som. The fingers or toes What is Raynaud's disease? In his thesis, Maurice Raynaud describes the condition afflicting a year-old female patient: "Under the influence of a very moderate cold she sees her fingers become ex It can cause them constrict, and spasm, so they become narrower and reduces the Raynaud's Disease or Raynaud's phenomenon is an exaggerated vasospastic response to cold temperature characterized by transient, episodic changes in skin colour of digits Raynaud's Phenomenon (RP) results when there is a rease in blood flow to the fingers and toes when someone is exposed to cold weather or stress. The fingers or toes typically ch.
