Étape 1 - The Problem

https://wikifab.org/wiki/Fichier:ReMake_Introduction.mp4

Reducing the negative environmental impact of urban living by incentivizing sustainable living

Étape 2 - The Devices

We use an ultrasonic sensor device connected to the cloud via LoRa to collect the data of the fill level of our smart bins

Étape 3 - The Super App

Our Super App rewards users with points that can be redeemed for household utilities vouchers. It also includes a market place for sustainable products created from waste
