Before installing the updated version of Adobe Acrobat Reader it is recommended that you remove the previous , - A lot of my users are experiencing an issue when they open a PDF document, it hangs or freezes randomly. If it locks up Reader is incapable creating a good version. I tried in Acrobat and go the same issue. Update the product to the latest version: Choose Help > Check for Updates and then follow the steps in the Updater window to download and install the latest updates. If Acrobat still crashes intermittently even after updating to the latest version, try Solutionbelow All of a sudden, as of Monday this week, Acrobat crashes withinseconds of openingThe problem occurs opening any PDF file, or even if the program is launched without opening a fileThe problem exists for both my local user account, as well as the administrator account This document provides troubleshooting steps for Acrobat crashes on launch. Some other reasons for Acrobat crashes include compatibility or insufficient permissions. Adobe Reader creates a new Preferences folder Even tough I have a Acrobat Pro license, I could not install Acrobat Pro, the only solution is to install the free Acrobat reader, after which it asks me to upgrade to Pro. Then it works for a few weeks until the fatal freeze again. I have a user experiencing a odd problem. Voted Best Answer. StepUninstall the old Adobe Acrobat Reader Version. Acrobat can close on launch if it's not activated or licensed for usage. To identify the root cause and resolve the issue, try the workarounds below in the order they appear To re-create the Adobe Readerpreferences folderQuitReaderIn Windows Explorer, go to Documents and Settings\ [username] \Application Data\Adobe\Acrobat\ folder and move the Preferences folder to another location (for example, C:\Temp)Start Adobe Reader. The forms work fine on other SolutionUpdate Acrobat to the latest version. I acrobat fill-in forms crashing. They have Adobe Acrobat (the free version) & are using fill-in forms. This morning I lost againhour to simply open and sign a PDF document Try redoing it and making the PDF again. Launch Acrobat. This is causing work disruptions across the Uninstall adobe DC, remove all adobe acrobat or DC folders from your system (including hidden ones inside App data and program data folders), restart your system and reinstall 3 Answers.
