Renewable energy sources—away from fossil fuels towards renewable energy sources. This Renewable energy and energy efficiency together offer over 40% of the mitigation measures needed to reduce energy-related emissions in the Transforming Energy The UAE has aimed for 50% renewable energy sources by 2050, reasing CO2 emissions by 20%, and reducing current energy consumption by 20%. China is a leading Asian country in terms of establishing various plans to develop green energy consumption across various that signatories commit to work together to triple the world's installed renewable energy generation capacity to at least, 10 TW by 2050 and to collectively double the global average annual rate of energy efficiency improvements from around two per cent to over four per cent every year until Renewable energy sources play a role in providing energy services in a sustainable manner and, in particular, in mitigating climate change. [1] concluded that implementing taxes on CO2 emissions would grow the investment in renewables and thus restrict CO2 emissions finance, renewable energy deployment, and climate change in China. Saleh et al. Citation: IRENA (2020), Climate Change and Renewable Energy: National policies and the role of communities, cities and regions (Report to the GClimate Sustainability KEY CLIMATE SOLUTION. Saleh et al. This Special Report on Renewable Energy Sources and Climate Change Mitigation explores the current contribution and potential of renewable energy (RE) sources to provide energy services for a sustainable Energy arbonisation is vital to keep the rise in global temperatures well below 2°C, in line with the aims of the Paris Agreement. This transition is motivated by many factors, including concerns about environmental impacts Citation: IRENA (2020), Climate Change and Renewable Energy: National policies and the role of communities, cities and regions (Report to the GClimate Sustainability Working Group (CSWG)), International Renewable Energy Agency, Abu Dhabi. About IRENA The International Renewable Energy Agency (IRENA) is an intergovernmental The UAE has aimed for 50% renewable energy sources by 2050, reasing CO2 emissions by 20%, and reducing current energy consumption by 20%.
