It does not supersede the B standard. Equations for Involute Spline Basic Dimensions ANSI B, R π = Note: All spline specification table dimensions in the standard are Involute Splines and Inspection B/ Involute Splines and Inspection. SAE was only PA, Bxx also covered 1/2° & ° splines, formerly °, were referred as "Serrations" Involute splines have maximum strength at the base, can be accurately spaced and are self-centering, thus equalizing the bearing and stresses, and they can be measured and fitted accurately. PS1 Parallel SAE Ø15, (Ø5/8")L23, Key 4xPS3 Parallel SAE Ø19, (Ø3/4")L23, Key 4, xSSpline SAE JT/SSpline SAE JT/ SAE JT/DP O, 3 T = ÷ [Nm] screw tightening torque MT = [Nm] admissible shaft torque (N.B. JB_ INVOLUTE SPLINES, SERRATIONS, AND INSPECTION JB_ - available for purchase at \$ Find the right standards and certifications for your needs with SAE JB_ Involute Splines, Serrations, and Inspection. When choosing a shaft, always check the Ø SAE A reversible rotation (with OR) SCFSplined ø z=9, H=SAE J 9T/32DP inlet Øa° ØM6 outlet Øa° ØM6 with external Current REVISED INVOLUTE SPLINES, SERRATIONS, AND INSPECTION JB_ - available for purchase at \$ Find the right standards and Missing: pdf Find the most up-to-date version of JB_ at g: pdf INVOLUTE SPLINES, SERRATIONS, AND INSPECTION. A table of the variables and the formula Also the internal only had one size the external was class 1 & class 2, Bxx had class 4, 5, 6 & for both internal & external. All splines currently meeting the requirements of the B standard are still in compliance with that standard. B/ This document is an extension of the current B standard. Document; Main Matt, SAE J did not have the total range of spline pitches that ANSI B did.
