You can also use PC shortcuts to make the process even simpler: Rotate clockwise – Shift+Ctrl+Plus. Select PDF files. To flip degrees, simply click one direction twice. An image, or scan that was in portrait orientation, is printed to a degree rotated landscape orientation. Select: File -> Print -> Printer: PDF Printer. You can also upload PDF files from a cloud storage service Select the direction you want to rotate. Print the rotated document as a new PDF file Select the PDF files you want to change PDF orientation or drag & drop them into the required area. Rotate counterclockwise – Shift+Ctrl

When selecting multiple images to put together into a pdf in file explorer, I select print, select Microsoft print to pdf, then the image preview is rotated degrees to a landscape orientation. Is there any way to stop this from happening? Follow these steps: Open the free version of Acrobat Reader (or any other PDF viewer that can rotate the document) Rotate to the correct view. Every time you click either Clockwise or Counterclockwise, the PDF will rotate degrees in that direction.
