On Torrens Island, Australia, four SGT gas turbines provide seasonal peaking support for the electrical grid. SGT Classic package The gas turbine and gearbox are placed on a SGT installation for both mechanical drive and power generation SGT Industrial gas turbine High reliability and availability in combination with good fuel flexibility and third-generation DLE makes the SGT a perfect choice for several onshore applications: Industrial power generation, oil and gas power generation Dimensions exclude inlet filter housing and exhaust stack. Combined cycle performance is based on two pressure non-reheat or three pressure non-reheat bottoming cycle.
