 Coût 16.47 USD (\$)

## Sommaire

Étape 1 - Drag videos to Joyoshare Video Joiner

Étape 2 - Set up merging mode and output format

Étape 3 - Cut videos if necessary

Étape 4 - Edit videos before merging (optional)

Étape 5 - Combine videos on Mac

Commentaires

## Matériaux

### Étape 1 - Drag videos to Joyoshare Video Joiner

Make sure that you have install the latest version of Joyoshare Video Joiner for Mac on your computer. Next, open it and simply drag videos to be combined to its main interface. Alternatively, click the "Open File" button located in the lower left corner to add video files.

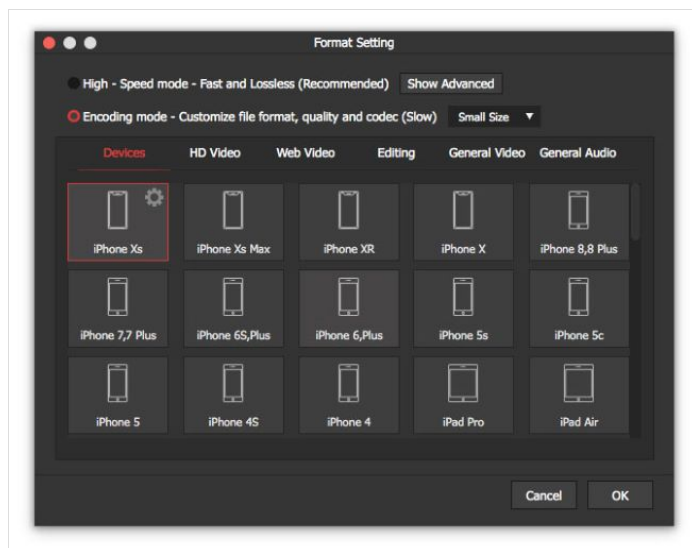

## Outils

## Étape 2 - Set up merging mode and output format

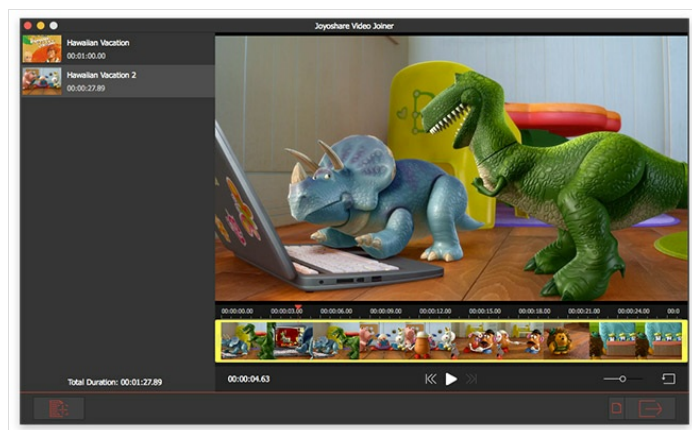

After that, tap on "Format" in the lower right corner to pick a merging mode and an output format depending on your needs. If you need to combine videos without re-encoding, choose the high-speed mode that is for merging videos of the same format with the original quality.

If these uploaded videos are encoded with different formats, you have to select the encoding mode. Besides combining different files without trouble, this mode allows you to customize parameters of the chosen output format by clicking a gear icon as well as to edit uploaded videos with awesome effects.

## Étape 3 - Cut videos if necessary

Once selected, press on "OK" button back to the previous interface. Then, click each video to preview. If you are not satisfied with certain sections, you can move the yellow timeline to cut them.

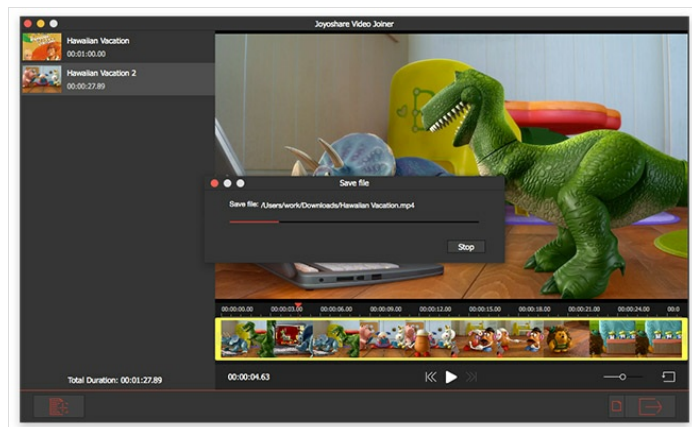

## Étape 4 - Edit videos before merging (optional)

Before merging, users who choose encoding mode to join videos have an opportunity to edit videos by touching the "Edit" icon. They can trim/rotate videos, change aspect ratio, use awesome visual and sound effects, insert unique watermarks, add synchronized subtitles, adjust saturation and brightness, etc.

## Étape 5 - Combine videos on Mac

After editing, click "OK" to exit the editing interface. Next, you can rename and reorder each video if needful. When everything is done, hit on "Convert" icon to start combining these videos. The merged single video will be saved in your local file folder.
