Introduction

If you choose solar products, you will have many brands to choose from. However, choosing a quality brand is not easy!

Introducing to you the Solahart brand, a leader in the solar energy field in Australia with more than 70 years of experience specializing in solar water heaters. Solahart Water Heaters has installed more than one million systems and built a reputation for high quality and reliability.

Coming to Solahart Vietnam, customers can be completely assured of a complete renewable energy solution including electric power, solar water heaters, and heat pumps.

Established in 1953 with a long history of more than 70 years of experience installing more than one million energy systems worldwide. Solahart VietNam deserves to be a national brand for all consumers nationwide.

Continuously update and improve product quality. Product designs and tests for Australia's harshest conditions. Surely brings satisfactory results to all customers.

Modern techniques, smart systems absorb more sunlight and save costs as much as possible. Besides making your life more convenient, the Solahart brand is very suitable for the green environment. The product helps reduce 1.6 to 2.7 tons of carbon per year.

If you need to use it, please contact us immediately for more detailed information as well as preferential quotes and attractive discounts for large orders.

Not only is the product price affordable, but the product itself also helps reduce your energy bills. Brings incredible savings with performance from solar panels and the longest-lasting battery.

With its reputation, the unit is committed to ensuring high quality products. In addition, customers can also become a Solahart agent with countless outstanding benefits.
