Once it comes up, choose the Export Files task in the pane. Embed fonts. If you select Set STEP configuration data, the STEP Configuration Data for Export dialog box appears. First, run the Task Scheduler from your Windows Start menu. If you select 3D curves or Export sketch entities, you can open the exported STEP files only in SOLIDWORKS Plus or later. The font definitions become part of the document, which increases file size but guarantees that the fonts are as defined in the original document. When you create a task, you click Options in the task properties dialog box to change the options for that task only. When the dialog appears to set up the task, click the dropdown arrow under "Export file type" and then choose Adobe Portable Document Format (\*.pdf) from that list. 'Verify that c:\test, the To set the PDF export options: Select from the following options: Option. Export PDF in color. Click OK. Print header/footer. All lines and splines are imported into a single 3D sketchUse specified printer line weights (Files, Print, Line Weights) When cleared, the default printer line weights are used. Set the export options when you export SOLIDWORKS documents as PDF files. For drawings only Displays the STEP Configuration Data for Export dialog box. High Quality. Choose folders that have Large complex Solidworks assembly fileMbsheet,view Solidworks drawing file of ASM aboveMb Normal PDF of the drawing fileMb 3D PDF of the assembly fileMb So, in the scheme of things, not such a storage demand to worry about. Description. Press any combination you want, in this case we will do (Ctrl + P) for Printing to PDF. Click Yes to Override, Click OK Meet the Task Scheduler. To set the PDF export options: Select from the following options: Click OK. Print header/footer Upload a document from your computer or cloud storageAdd text, images, drawings, shapes, and moreSign your document online in a few clicksSend, This example shows how to export the specified sheet in a drawing document to a PDF file. To change the default option values, click View > Options > PDF Launch SOLIDWORKS and Create a New Drawing (New > Drawing (use any available template)) Right click on the Task bar > Customize > Keyboard Tab > Scroll to the very bottom until you see the row for the Macro button. Also, it's within normal range of ability to email to others (-Mb attachment limit 'Verify that the specified drawing document to open exists.
