It showcases the opportunity that all companies have for huge climate impact through action to arbonize global supply chains Supply Chain arbonization. Corporate-level reporting, guided by the widely-used Greenhouse Gas Protocol, is a spreading reality. The main aim is to determine the extent to which abatement technologies across the The article examines the conceptual foundations of the formation of a strategy for the arbonization of supply chains, the identification of strategic solutions for reducing arbonizing supply chains: the next level of corporate action. Supply chain emissions are on average times larger than direct emissions from operationsActivating wide-scale arbonization efforts across supply chains is one of to reducing global emissions, addressing supply chain emissions can strengthen relationships with suppliers and customers and identify ways you can collaborate The study discusses the implications of supply chain arbonization from a theoretical and practical perspective, proposes four recommendations for the industry to implement emissions from the supply chains for buildings and transport infrastructure construction. It can enable companies with relatively small direct-emissions footprints to have impact on a global scale Last year's report on the Net-Zero Challengehighlighted how much more individual actors – governments, corporations, investors and individuals – could do to bring down emissions, and many have heeded that call Key to supply-chain-wide arbonization is an understanding of COemissions across the system. Product level foot-printing is an important step towards supply chain carbon rationalisation. It has been given a boost by the Download PDF. This report, co-authored with Boston Consulting Group, is the second in our series for the Net-Zero Challenge. Download PDF. Significant movement is expected towards reduced supply chain carbon intensity Supply chain arbonization—and, more broadly, analyzing the relationship between the supply chain and climate change—presents a giant untapped opportunity for international action.
