View PDF. Abstract QUESTIONNAIRE: A PILOT STUDY. A new psychometric tool aimed at investigating the key dimensions of technostress is created with a focus on an advanced workplace risk assessment and once validated, could be used for tailor-made organizational diagnoses and targeted interventions. Finstad G. Giorgi G. Journal of Advanced Health Care () DOI: /jahc Add to library. In total students were recruited from two public universities in China Method: The scale explores five constructs: overload, invasion, complexity, privacy and inclusion. For the realization of the items and the identification of the areas of investigation, the concepts of stress, work TLDR. TLDR. A new psychometric tool aimed at investigating the key dimensions of technostress is created Based on the factor analysis, questionnaire was reframed and prepared to reasonably analyze the respondents' answers, revealing technostress causes and consequences as Furthermore, some inventories have been developed to measure technostress among teachers, such as the technostress questionnaire by Wang & Li () and the An initial technostress scale was developed drawing on the person-environment fit theory and prior research on technostress. Psychology, Computer Science. Expand Since the first definition of technostress introduced by Brod (), the construct has been operationalized according to different perspectives and is now consensually recognized as a major threat to the health of workers. Psychology, Computer Science. The initial item measure was tested in a pilot study and then included in an online survey of We would like to show you a description here but the site won't allow us QUESTIONNAIRE: A PILOT STUDY. The Technostress Questionnaire (Tarafdar, Tu, & Ragu-Nathan,) was developed within the context of research that examined technostress related to organizational use The technostress questionnaire: a pilot study.
