It makes hormones that control every part of your metabolism, from your heart rate to how quickly you burn calories. Your thyroid is a butterfly-shaped gland located in the front of your neck. Background: Surgical management of thyroid disease has evolved This chapter presents a clear and concise description of current thought and practice concerning the surgical treatment of thyroid diseases. FOLLOWING THYROID SURGERY, YOU WILL HAVE AN INCISION (CUT) THAT WILL REQUIRE SPECIAL CARE Thyroidectomy is the removal of the thyroid gland, which is shaped like a butterfly and lies across the windpipe (trachea). Thyroid hormones help the body use energy, stay warm and keep the brain, heart, muscles, and other organs working as they should. It makes hormones that control Missing: pdf American Thyroid Association Objective: To develop evidence-based recommendations for safe, effective, and appropriate thyroidectomy. Health care providers perform thyroidectomy to treat thyroid disorders The most common thyroid problems are: An overactive gland, called hyperthyroidism (e.g., Graves' disease, toxic adenoma or toxic nodular goiter) An underactive gland, called hypothyroidism (e.g., Hashimoto's thyroiditis) Thyroid enlargement due to overactivity (as in Graves' disease) or from under-activity (as in hypothyroidism) The thyroid's job is to make thyroid hormones, which are secreted into the blood and then carried to every tissue in the body. Sections within this chapter include 1) normal and abnormal anatomy and embryology of the thyroid and surrounding neck structures; 2) indications for operation of benign lesions of this gland; 3) diagnosis Preparing for Thyroid Surgery Please inform your surgeon of any signs of cold, infection, or fevers that appear before surgery Do not eat or drink after midnight on the night before your operation If you take any prescription medications on a daily basis, take as specifically instructed by your surgeon and/or anesthesiologist Thyroidectomy is the surgical removal of all or part of your thyroid gland. Your thyroid is a butterfly-shaped gland located in the front of your neck. The gland makes hormones that control how your body Preparing for Thyroid Surgery Please inform your surgeon of any signs of cold, infection, or fevers that appear before surgery Do not eat or drink after midnight on Thyroidectomy is the surgical removal of all or part of your thyroid gland.
