Outils

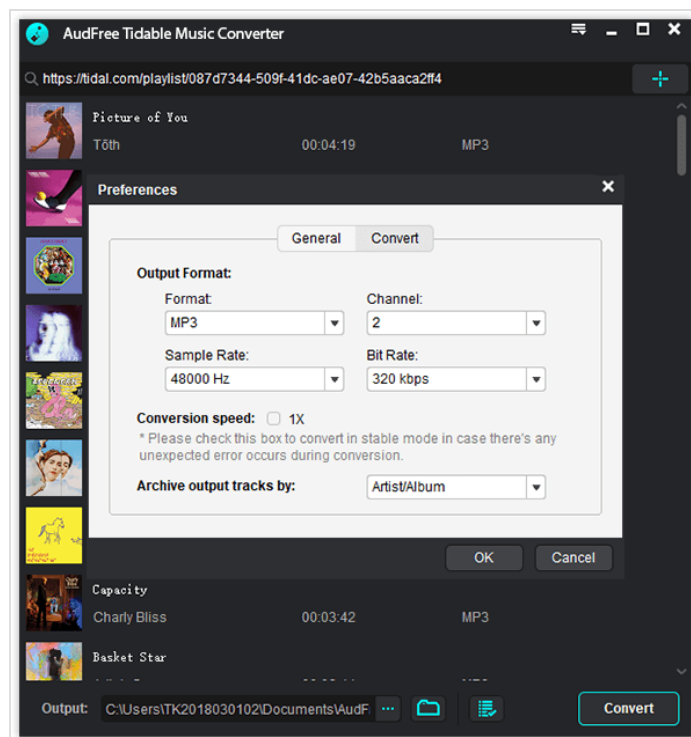

 tape 1 - Import Tidal songs

Open AudFree Tidal Converter and at the same time Tidal app will automatically start. Search Tidal songs that you want to play through Discord from Tidal. Then, copy the corresponding link and paste it in the search field of AudFree's main interface. Simply click the "+" icon to load Tidal music.

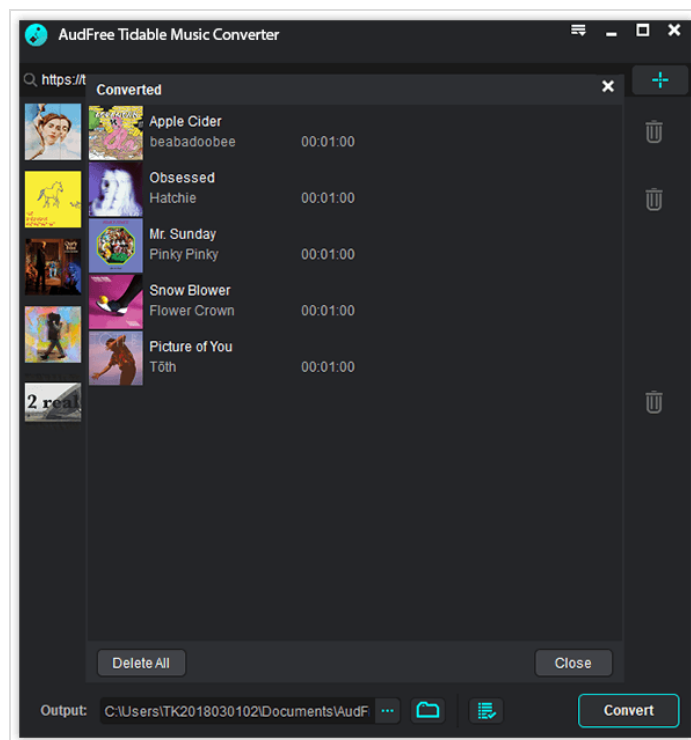

Étape 2 - Set output parameters for Discord

When all Tidal songs you want are loaded up, go to the top-right "Menu" option > "Preferences" > "Convert". On the "Convert" panel, choose any output format, customize channel, sample rate, bit rate to your requirements for Discord. Once set up, use "OK" button to confirm and save output settings.

Étape 3 - Convert Tidal songs for Discord

The last thing you need to do is hitting the "Convert" button to make AudFree start converting and downloading Tidal songs to local at 5X faster speed. When completed, locate "Converted" icon to acc

Étape 4 - Play Tidal through Discord

Now, please import downloaded Tidal songs to Spotify and then you can play Tidal on Discord by connecting Spotify on Discord. To add local Tidal music files to Spotify:

1. Run Spotify and log in;
2. Click "Menu" > "Settings" > "Local Files" > enable "Show Local Files";
3. Tap "ADD A SOURCE" to add Tidal music files from local folder to Spotify.
