Thisft. antenna is in three sections and is rated for up to mph maximum winds. At W rated capacity this centre load amateur ham radio antenna will handle most Update: Well, the worked for a while and then water ingress. With the Tram you will enjoy dBd gain over MHz and dBd gain over MHz. This is all thanks to the 5/8 wave multi element design. It worked for about four years. The antenna lasted basically months. Now feet away, and feet lower on my garage/workshop I have a TRAM which I use on The Tram is a robust antenna delivering exceptional performance over the 2M VHF band and CM UHF band. \$ Solid Signal has everything you need to get the job done! Thisft. antenna is in three sections and is rated for up to The Tram is a robust antenna delivering exceptional performance over the 2M VHF band and CM UHF band. We stock DIRECTV and Dish Network dishes and receivers, HDMI cables, wireless cellphone signal boosters, home security systems, satellite installation tools including multi switches and cables and other satellite tv products! Three other fellow hams I know also had the same water issue with this model. I do a terrible job putting a Tram Dualband VHF/UHF High Gain Vertical antenna together, and put it to the test against a Signal The Flex Seal apparently did it's job. I haven't been on the air with it, but I'll do that soon, and I'll see what the SWR is on each band The Tram is a high performance dual band UHF/VHF fiberglass Base Antenna with a watt power rating. Avoid it Initial Review I previously enjoyed my purchase of a Tram and ided to acquire this upgrade antenna as a replacement, leaving the for other duties Finally! I assemble the Tram B dual band antenna. Finally! I assemble the Tram B dual band antenna. With the Tram you will enjoy dBd gain over W Wow an unboxing video! Availability: In Stock. I haven't been on the air with it, but I'll do that soon, and I'll see what the SWR is on each band The Tram is a high performance dual band UHF/VHF fiberglass Base Antenna with a watt power rating.
