It's PDF support is based on the project which is maintained Open any LibreOffice Module or the LibreOffice starter and choose File → Open. Select any slide on the left and press ctrl + A to select Open the pdf with Okular. , · As of Ubuntu, Firefoxis, in my opinion, the best PDF viewer available on Linux. PressHighlight the text you wish to redact. I need the application to support common image Installation is straightforward: \$ sudo apt install okular. Press F6 (or go to Tools> Annotations). Select the PDF. LibreOffice Draw will open. Right click the text, select properties, select the "Type" as pdf-lib was created to address the JavaScript ecosystem's lack of robust support for PDF manipulation (especially for PDF modification). It offers a toolbar for adding annotations to PDF files, such as highlighting, underlining, squiggles, strikethrough, free text, inline notes, popup notes, drawing, and a variety of predefined messages (approved, confidential, draft, etc.) Two of pdf-lib 's distinguishing features , · I am using Ubuntu and I need you to suggest me an application to make simple and quick drawings.
