Word save as pdf without updating fields

Try Adobe Acrobat online for free Once your PDF is created, you can generate fields using the Forms wizard in Adobe Acrobat. This can be done on a Mac, but the simplest way to do it is to set your templates up using a Windows version. However, note that most likely you will have to accept all changes and then turn off Track Changes to get the desired appearance when printing to PDF (or printing to paper, for that matter) With the Word Options dialog box still open, do the following: Click Advanced at the left side of the Word Options dialog box. Scroll down until you see the Print section. However, I don't know if that feature is available in the free version, but it's worth checking outGo to File > Options > Display and uncheck the option Update fields before printing. (My experiment shows that this option also affects saving to PDF as well as printing to PDF.) If that doesn't work for you, you can select the whole document (Ctrl+A) and lock the fields (Ctrl+F11) to prevent them from updating The best way to do this is with mapped content controls, IMO. Repeating Data Using Document Property Content Controls and Other Mapped Content Controls. Make sure the Allow Fields Containing Tracked Changes to Update Before Printing check box is You could try turning off the Update fields before printing option in Office button Word Options Display category. They will still work on a Mac Report abuse. Select a DOC or DOCX file to get started. (See Figure) FigureThe print settings in the Word Options dialog box. However, I don't know if that feature is available in the free version, but it's worth checking out. at You can find the trial here: Convert a Microsoft Word file into a PDF in four easy steps. Select a DOC or DOCX file to get started. Try Adobe Acrobat online for free.
