

Design an object on 3D Slash and view it in VR

In This tutorial you will learn how to use the on-line software 3D Slash to create 3D objects, and later view them in VR on your smartphone.

 Difficulty **Easy**

 Duration **30 minute(s)**

 Categories **Electronics, Play & Hobbies, Robotics, Science & Biology**

 Cost **10 EUR (€)**

Contents

Step 1 - Create a 3D object on 3D Slash

Step 2 - E-mail the link of your 3D object

Step 3 - View the object in VR on your smartphone

VR Headset

Step 1 - Create a 3D object on 3D Slash

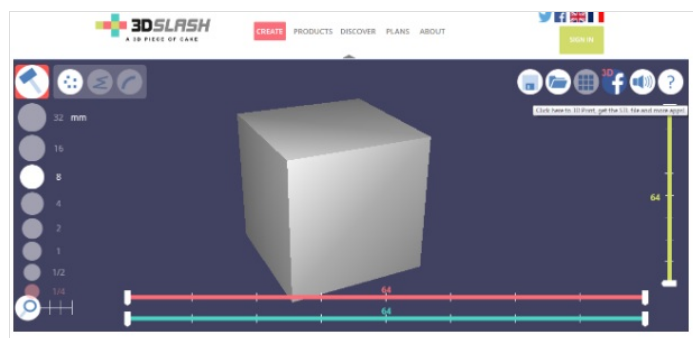

Go on 3Dslash.net and click CREATE

You can follow the tutorials available on the website, in order to learn how to use all available functionalities.

For example, you can improve your design by adding colors, adding basic geometrical shapes, or import 3D files that you have downloaded from the web.

Step 2 - E-mail the link of your 3D object

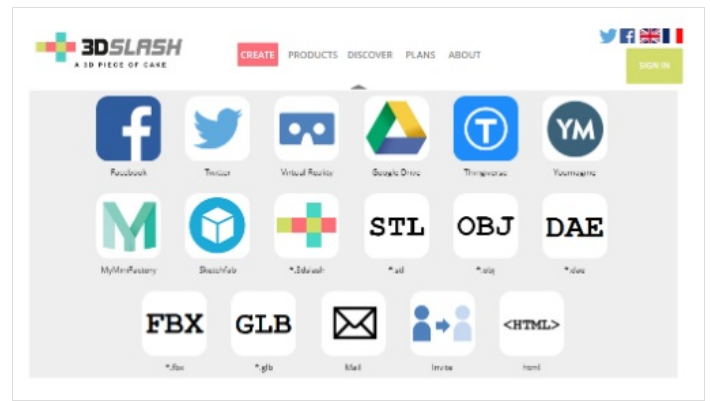

Once you're done modeling your 3D object, click on the square button and chose "Mail" to send yourself an e-mail containing the link to the 3D design.

Step 3 - View the object in VR on your smartphone

On your smartphone, open the e-mail and you will be redirected to your 3D model on 3D Slash.

On your smartphone, go back to the options of your 3D slash design, and choose "Virtual Reality".
